Author Index to Volumes 102 and 103

Ablowitz, M. J. (with Chakravarty and Halburd), The Generalized Chazy Equation from the Self-Duality Equations, 103:75

Balmforth, N. J. (with Morrison), A Necessary and Sufficient Instability Condition for Inviscid Shear Flow, 102:309
Banerjee, Mihir B. (with Shandil, Gourla, and Chauhan), Eigenvalue Bounds for the Orr–Sommerfeld Equation and Their Relevance to the Existence of Backward Wave Motion, 103:43
Bassom, Andrew P. (with Ludlow and Clarkson), Similarity Reductions and Exact Solutions for the Two-Dimensional Incompressible Navier–Stokes Equations, 103:183
Baumstein, Anatoly I., Steady Nonsymmetrical Gravity Waves with Shear in Water, 102:267
Byatt-Smith, J. G., The Borel Transform and Its Use in the Summation of Asymptotic Expansions, 103:339

Chakravarty, S. (with Ablowitz and Halburd), The Generalized Chazy Equation from the Self-Duality Equations, 103:75
Chauhan, S. S. (with Banerjee, Shandil, and Gourla), Eigenvalue Bounds for the Orr–Sommerfeld Equation and Their Relevance to the Existence of Backward Wave Motion, 103:43
Clarkson, Peter A. (with Ludlow and Bassom), Similarity Reductions and Exact Solutions for the Two-Dimensional Incompressible Navier–Stokes Equations, 103:183

Davis, A. M. J. (with Mallier), Nonlinear Evolution of Singular Disturbances to the Bickley Jet, 103:149
Denier, James P. (with Stott), Wave-Mean Flow Interactions in Thermally Stratified Poiseuille Flow, 102:121

Fusco, D. (with Manganaro and Migliardo), Pulselike Exact Solutions for a Model Describing Nerve Fibers, 103:25

Gourla, M. G. (with Banerjee, Shandil, and Chauhan), Eigenvalue Bounds for the Orr–Sommerfeld Equation and Their Relevance to the Existence of Backward Wave Motion, 103:43

Halburd, R. (with Ablowitz and Chakravarty), The Generalized Chazy Equation from the Self-Duality Equations, 103:75

Ji, Hui (with Riemenschneider and Shen), Multivariate Compactly Supported Fundamental Refinable Functions, Duals, and Biorthogonal Wavelets, 102:173
Jiang, X.-H. (with Wong), Justification of a Perturbation Approximation of the Klein-Gordon Equation, 102:375
Jones, Don A. (with Shkoller), Persistence of Invariant Manifolds for Nonlinear PDEs, 102:27
Joseph, K. T. (with Sechdev and Rao), Analytic and Numerical Study of N-Waves Governed by the Nonplanar Burgers Equation, 103:89
Joshi, Nalini, The Second Painlevé Equation in the Large-Parameter Limit I: Local Asymptotic Analysis, 102:345

Kichenassamy, S., WTC Expansions and Nonintegrable Equations, 102:1
Knessl, Charles (with Tier), A Ray Approximation to a PDE that Arises in the Study of Tandem Queues, 102:87
Krishnamurti, Ruby (with Yang), Hele Shaw Convection with Imposed Shear Flows: Boundary-Layer Formulation, 103:1

Laforgue, Jacques G. L. (with O'Malley), Exponential Asymptotics, the Viscid Burgers' Equation, and Standing Wave Solutions for a Reaction-Advection-Diffusion Model, 102:137
López, José L. (with Temme), Uniform Approximations of Bernoulli and Euler Polynomials in Terms of Hyperbolic Functions, 103:241
Ludlow, David K. (with Clarkson and Bassom), Similarity Reductions and Exact Solutions for the Two-Dimensional Incompressible Navier–Stokes Equations, 103:183

Mallier, R. (with Davis), Nonlinear Evolution of Singular Disturbances to the Bickley Jet, 103:149
Mallier, R. (with Maslowe), Weakly Nonlinear Evolution of a Wave Packet in a Zonal Mixing Layer, 102:69
Manganaro, N. (with Fusco and Migliardo), Pulselike Exact Solutions for a Model Describing Nerve Fibers, 103:25
Maslowe, S. A. (with Mallier), Weakly Nonlinear Evolution of a Wave Packet in a Zonal Mixing Layer, 102:69
Migliardo, M. (with Fusco and Manganaro), Pulselike Exact Solutions for a Model Describing Nerve Fibers, 103:25
Montgomery, P. J. (with Moodie), Two-Layer Gravity Currents with Topography, 102:221
Moodie, T. B. (with Montgomery), Two-Layer Gravity Currents with Topography, 102:221
Morrison, P. J. (with Balmforth), A Necessary and Sufficient Instability Condition for Inviscid Shear Flow, 102:309

O'Malley, Robert E., Jr. (with Laforgue), Exponential Asymptotics, the Viscid Burgers' Equation, and Standing Wave Solutions for a Reaction-Advection-Diffusion Model, 102:137

Payne, L. E. (with Straughan), Convergence and Continuous Dependence for the Brinkman–Forchheimer Equations, 102:419
Payne, L. E. (with Straughan), Convergence of the Equations for a Maxwell Fluid, 103:267

Rao, Ch. Srinivasa (with Sachdev and Joseph), Analytic and Numerical Study of N-Waves Governed by the Nonplanar Burgers Equation, 103:89
Riemenschneider, Sherman D. (with Ji and Shen), Multivariate Compactly Supported Fundamental Refinable Functions, Duals, and Biorthogonal Wavelets, 102:173
Rosales, Rodolfo R. (with Shefter), Quasiperiodic Solutions in Weakly Nonlinear Gas Dynamics. Part I. Numerical Results in the Inviscid Case, 103:279

Sachdev, P. L. (with Rao and Joseph), Analytic and Numerical Study of N-Waves Governed by the Nonplanar Burgers Equation, 103:89
Satır, Ahmet, Classification of $q_t = P(x, t, q, q_x, q_{xx})$, 102:205
Shandil, R. G. (with Banerjee, Gourla, and Chauhan), Eigenvalue Bounds for the Orr–Sommerfeld Equation and Their Relevance to the Existence of Backward Wave Motion, 103:43
Shefter, Michael (with Rosales), Quasiperiodic Solutions in Weakly Nonlinear Gas Dynamics. Part I. Numerical Results in the Inviscid Case, 103:279

Shen, Jianhong, Combinatorics for Wavelets: The Umbral Refinement Equation, 103:121
Shen, Zuowei (with Ji and Riemenschneider), Multivariate Compactly Supported Fundamental Refinable Functions, Duals, and Biorthogonal Wavelets, 102:173
Shkoller, Steve (with Jones), Persistence of Invariant Manifolds for Nonlinear PDEs, 102:27
Spigler, Renato (with Vianello), On the Complex Differential Equation $Y'' + G(z)Y = 0$ in Banach Algebras, 102:291
Stafford, Douglas (with Ward), Metastable Dynamics and Spatially Inhomogeneous Equilibria in Dumbbell-Shaped Domains, 103:51
Stott, Jillian A. K. (with Denier), Wave-Mean Flow Interactions in Thermally Stratified Poiseuille Flow, 102:121
Straughan, B. (with Payne), Convergence and Continuous Dependence for the Brinkman–Forchheimer Equations, 102:419
Straughan, B. (with Payne), Convergence of the Equations for a Maxwell Fluid, 103:267

Temme, Nico M. (with López), Uniform Approximations of Bernoulli and Euler Polynomials in Terms of Hyperbolic Functions, 103:241
Tier, Charles (with Knessl), A Ray Approximation to a PDE that Arises in the Study of Tandem Queues, 102:87
Trione, Susana Elena, The Expression of The Laplace Transform of $(P \pm i0)^{\lambda}$ as a K-transform, 103:259

Vianello, Marco (with Spigler), On the Complex Differential Equation $Y'' + G(z)Y = 0$ in Banach Algebras, 102:291

Ward, Michael J. (with Stafford), Metastable Dynamics and Spatially Inhomogeneous Equilibria in Dumbbell-Shaped Domains, 103:51
Wong, R. (with Jiang), Justification of a Perturbation Approximation of the Klein–Gordon Equation, 102:375

Yang, Huijun (with Krishnamurti), Hele Shaw Convection with Imposed Shear Flows: Boundary-Layer Formulation, 103:1
